Quiz Study Guide

1. Your best friend from elementary school finds you on the internet and says he wants to trade home page links. How do you put a link to his site at www.supercheats.com/~billybob/ on one of you home page links?

   Put the following on your page:

   ```
   <a ref="http://www.supercheapsuits.com/~billybob/">
   ```

2. What HTML code would you use to make it possible for someone clicking the words "About the Authors" at the top of a page to skip down to a list of credits somewhere else on the page?

   Type this at the top of the page:

   ```
   <a href="#credits">About the Authors</a>
   ```

3. If your email address is bon@soir.com, how would you make the text "goodnight greeting" into a link that people can click to compose and send you an email message?

   Type the following on your webpage:

   ```
   Send me a <a href="mailto:bon@soir.com">goodnight
   ```

4. What attribute can you add to an HTML element to turn it into an anchor?

   The `id` attribute can be used on any HTML element as an anchor.

5. What character do you use to link to an anchor?

   You use the pound sign (#) to link to a named anchor point on the page.

6. How do you tell a browser that the link target document should be downloaded rather than loaded in the window?.

   Use the attribute download to tell the browser the link targeted should be downloaded.

7. When should you include http:// in a link?

   You should use the http:// and the rest of the FQDN when you are linking to a page outside the current site.

8. What mail features can you use in a mailto link?

   You must point to the email address the message is to. Optional values are `subject`, `body`, `cc`, and `bcc`.

9. When is the best case to force a link to open in a new window?

   You should avoid forcing links to open a new window at all costs.

10. What pseudo-class do you use to style visited links?

    Use the a:visited pseudo-class to style visited links.
